

Length (2 byte)

The diagram illustrates a packet structure. It consists of four main fields arranged vertically. The first field is 'Length (2 byte)', which is the top-most section. Below it is the 'Type (1 byte)' field, which is the narrowest section. The third field is 'Identifier (4 byte)', which spans the width of the packet. The bottom-most and largest section is the 'Payload (1...)' field. All fields are enclosed in dashed-line boxes.

Type (1 byte)

Identifier (4 byte)

Payload (1...)
